

Ladies and Gentlemen,  
Dear colleagues,

I would like to welcome you to the 22<sup>nd</sup> annual congress of the DAHTH, the German Association for Hand Therapy.

The DAHTH has a special connection to this venue in Munich because this is where it was founded on May 6<sup>th</sup> in 1995. May this be considered to be a positive omen to experience an exciting and successful congress.

Under the paramount theme „Hand therapy – interdisciplinary networking“ we examine current issues of hand therapy and show the connection to other disciplines such as neurology, trauma therapy and ergonomics.

The approved combination of workshops and lectures gives you the opportunity to gain both theoretical and practical improvement.

In times of the Brexit and the enhancement of national interests, I am very happy that on the therapeutic level the importance of an international and professional exchange is pointed out by our British speakers.

For the two evening events we would like to encourage you to use the opportunity to not only talk about business but also try to enjoy yourselves.

I hope we will all have an enriching and successful congress. Therefore all the best wishes to you.

Regine Görge-Radina
